LETTER FROM THE PRESIDENT

As we celebrate 20 years of Earth Rangers, it's impossible to mark this milestone without reflecting on the incredible legacy of our founder, Robert Schad.

When Robert created Earth Rangers, it was with a simple but powerful belief: that every child has a natural love for animals. He understood that if we could nurture that connection, we could inspire a lifelong commitment to protecting the environment. That belief became the foundation of our work and continues to guide us today.

Robert's passion, vision, and relentless pursuit of excellence are woven into every part of Earth Rangers—from our programs and partnerships to the way we speak to and about children. He believed deeply in the power of kids to change the world. With over 400,000 members and alumni today, his vision is realized again and again.

Though we lost Robert this year, his legacy lives on in every child who plants a pollinator garden, helps protect an endangered species, or stands up for the planet. His vision built Earth Rangers—and that vision will carry us into the next 20 years.

In 2024, we continued to build on that legacy through new programming designed to help young people better understand and engage with the world around them—from transitioning to a circular economy, to supporting regenerative farming, to conserving freshwater. It's work Robert would have been proud of.

With gratitude,

Tovah Barocas
President

BOARD OF DIRECTORS

Peter Kendall, Chair

Executive Director,
The Schad Foundation

Vince Commisso

President & CEO,

Entrepreneur, Industrialist, Philanthropist, and Animal Lover

HOW IT ALL BEGAN

AN INTERVIEW WITH ONE OF EARTH RANGERS' FIRST EMPLOYEES

Christopher Hakes serves as the Anthesis Group's associate director for European, Middle Eastern, and African carbon markets. He provides sustainable solutions and enables clean energy transitions for some of the largest and most impactful companies in the world.

But long before he became a sustainability expert on the global stage, Chris graced a much smaller stage: the Kortright Centre's auditorium, where he helped to deliver Earth Rangers' very first assembly.

We chatted with Chris about the earliest days of Earth Rangers, looking back at how it all began! The conversation has been edited for length and clarity.

What do you remember about your first day at Earth Rangers?

On my first day at Earth Rangers, I was nervous. I knew Peter Kendall a little bit, but I'd only met Robert Schad once, and I was very intimidated. I was, however, equally excited, and felt like it was the start of something great—which it was.

We were working out of the Schad Foundation offices at Husky Injection Moulding in Bolton, Ontario, and I found it fascinating to be based in this large industrial company.

Do you have a favourite memory or moment from your time at Earth Rangers?

I have two! The first was when we gave our first presentation at the Kortright Centre. My presentation partner, Haviva Porter, and I had so much fun (once we'd gotten over the nerves!) and we were amazed by the response from kids. The second was about two years after I started, we moved into the new Earth Rangers Centre! By this time, we were about 20 staff. With this amazing centre and an ever-improving school program, it felt like a major milestone, and that we had real momentum.

How did Earth Rangers' mission and vision feel to you when you started? Has that feeling changed?

I felt deeply aligned with the mission and vision and still do in my current area working on cutting corporate GHG emissions through nature-based solutions in the carbon markets.

Was there a moment when you realized, "Wow, this is really making an impact?"

After a couple of years of trial and error, we began to return to some of the schools where we'd had our first presentations. Word had obviously gotten around about the presentation (and the animals, of course), and we were greeted like rock stars. Kids were falling over each other after presentations to tell us what they were doing to help the environment. That was very special.

Do you have a favourite Animal Ambassador?

Our first Animal Ambassador was Squeaky, a one-winged red-tailed hawk who lived at the Toronto Wildlife Centre. I'll never forget first learning to get him to perch on a leather glove, tie tresses, and feed him mice!

What are you most proud of when you think back on your time at Earth Rangers?

It's the school program that I was most deeply affiliated with. Knowing that continues makes me very happy.

To those just starting out at Earth Rangers: Wear the frog with pride!

SCHOOL ASSEMBLIES

For 20 years, Earth Rangers has inspired students to care about biodiversity and protecting nature.

It began with live animal presentations, and our beloved Animal Ambassadors showing off their natural behaviours. These unforgettable encounters got students fired up about conservation—and we've only grown from there.

Our newest assembly brings environmental education to life like never before. With holograms, animatronics, bubbles, wind effects, and more, it's a fully interactive experience designed to surprise, delight, and spark curiosity. Students walk away inspired—and with memories that last a lifetime.

2006

2024

2004

Earth Rangers is founded by Robert Schad and Peter Kendall. We move into our headquarters at the Earth Rangers Centre, located at the Kortright Centre for Conservation.

2005

We give our first live presentation led by presenters Christopher Hakes and Haviva Porter, featuring Animal Ambassadors and multimedia storytelling—much to the delight of the kids in attendance.

2009

The school program expands outside of the GTA to reach communities across Ontario.

We launch Bring Back the Wild—our first fundraising program for kids alongside our partnership with NCC to support four species each year.

2024 SCHOOL TOUR

In 2024, **we reached over 275,000 students in 891 schools across Canada**—from Bonne Bay, Newfoundland to Campbell River, BC, and dozens of communities in between. We also piloted our program in 60 schools across Michigan and Wisconsin, kicking off an exciting expansion into the U.S.!

Here's just a taste of what students experienced:

- **Animal Ambassadors** like Sonic the Barn Owl and Shelly the Midland Painted Turtle showing off their incredible adaptations
- **ECO**—our holographic Earth Rangers Communications Operative—sharing her 740 petabytes of wildlife knowledge
- **Whales, birds, and fish** soaring and swimming through the air above students' heads
- **Interactive games and trivia** that got students cheering and thinking
- **A captivating mystery** led by podcast host Earth Ranger Emma, packed with clues and surprises for students to solve

FROM STUDENT TO SCIENTIST

Growing up in Québec, Emmanuelle Gouin was captivated when Earth Rangers visited her school. She experienced one of our very first Éco Héros assemblies—and that moment sparked a lifelong passion for protecting wildlife.

Today, Emmanuelle is pursuing a master's degree in environmental science at the Université du Québec à Rimouski, where she's researching the effects of Arctic warming on the snow bunting—a small bird that plays a critical role in the fragile balance of Northern ecosystems.

Now it's Emmanuelle's turn to inspire the conservationists of tomorrow! This fall, Earth Rangers is proudly supporting Emmanuelle's research through our Wildlife Adoptions Program—and she'll be sharing her knowledge and passion with the next generation of Éco Héros and Earth Rangers with a feature in our School Assembly.

2011

Our School Assembly hits the road for our first National Tour to major cities across Canada, including Halifax, Montreal, Winnipeg, Calgary, and Vancouver.

2012

The Earth Rangers Centre is awarded LEED Platinum Certification.

2013

We partner with the Toronto Zoo to incubate, raise and release threatened Blanding's turtles into the wild.

2013

The Membership Program is born, complete with a revamped website and our first card-carrying Earth Rangers!

2014

We launch our first five Missions to teach kids about the environment and how to take action, with activities like battery recycling, sustainable crafts, and birdhouse building.

SUPPORTING CONSERVATION

Since 2009, Earth Rangers has proudly supported wildlife conservation projects across Canada and around the world through kid-led fundraising!

From \$2 button drives to wildlife adoption kits to all kinds of stands (think lemonade, arts & crafts, and hot chocolate) ... the one thing that's always been consistent is the passion kids have for protecting animals!

NEW ADOPTIONS IN 2024!

PhD student **Claudia Haas** works with the Łutsël K'é Dene First Nation community to implement a community-led caribou stewardship plan in their Traditional Territory.

NCC's **Megan Quinn** braves all seasons to protect the wild beauty of Ottawa Valley, removing invasive species while monitoring the population health of native species.

The Sea Turtle Education & Protection Program engages local kids—like nine-year-old **Gerardo**—in conserving sea turtles by protecting nests and keeping oceans clean!

PhD student **Sandra Yaacoub** studies the impact of invasive spruce bark beetles on boreal forests in Kluane National Park, guiding its restoration for species like lynx.

NCC's **Sarah Bayliff** and her team work in BC's Bunchgrass Hills studying the health of native grasses—important plants that clean and filter water, prevent erosion, and provide food and shelter for wildlife.

Master's student **Karl-Antoine** works with the Vuntut Gwitchin First Nation's Land Guardians to study wolf activity by combining tracking data with traditional Indigenous knowledge from the community.

Ashley Sahulka works with NCC to preserve Saskatchewan's Cypress Uplands ecosystem; home to rare landforms and species like cougars.

SUCCESS STORIES

ADDISON TOOK A STAND FOR WILDLIFE!

In 2024, kids across Canada joined our **Take a Stand for Wildlife** campaign, raising funds for conservation. Whether they ran lemonade stands, sold handmade crafts, or whipped up tasty treats for a bake sale, every participating Earth Ranger made a meaningful difference for at-risk species.

Earth Ranger Addison decided to raise \$500 to help swift foxes—a native prairie species once wiped out in Canada but now making a comeback thanks to conservation efforts. Selling homemade cookies and bracelets, Addison more than doubled her goal, **raising an impressive \$1,007.75!**

"I learned a lot about perseverance. Raising money was hard especially because during the door to door portion of my campaign I got a lot of no's and was originally very discouraged but I stuck with it and am very proud of both myself and my results!"

Read more about Addison's fundraising journey and advice to her fellow Earth Rangers on our [Wild Wire blog](#).

SPOTLIGHT ON NCC: OUR FIRST CONSERVATION PARTNER

Earth Rangers has been collaborating with the Nature Conservancy of Canada (NCC) to protect and restore habitats across Canada for 15 years, with our members raising over \$772,000 in support of NCC.

*"At NCC, we believe that conserving nature for future generations begins with inspiring young people today. **Our partnership with Earth Rangers has allowed us to connect with hundreds of thousands of children and families across the country**, sparking a lifelong love of nature and empowering them to take meaningful action in their own communities. The funds raised by Earth Rangers members have directly supported our on-the-ground conservation efforts in over 12 locations—helping protect vital habitats and the wildlife that depend on them. Seeing the passion, creativity, and determination of these young change-makers is not only heartening—it fills us with genuine hope for the future of Canada's natural heritage."*

Catherine Grenier
President & CEO, Nature Conservancy of Canada

CANDLES, CAKE, AND CONSERVATION!

Blow out the candles and bring back the wild? Our partners at ECHOage make it possible for families to plan the perfect party—and raise funds for critical conservation projects.

NOAH

"I chose to support Earth Rangers because I really like animals. I think it's nice to help animals."

IVA-DAWN

"She just turned two and donated to Earth Rangers instead of asking for presents. She just loves all animals great and small."

ELEANOR

"I chose to get a rabbit and red panda adoption kit because they are some of my favourite animals."

MEMBERSHIP

We welcomed 42,789 new members in 2024—bringing the total to over 400,000 kids who have signed up since our Membership Program launched in 2013!

Some of our earliest members are still involved in conservation:

Ever since he was little, **Phin** has been passionate about the outdoors. His curiosity about animals led him straight to Earth Rangers! In 2015 he became a member and dove into every Mission he could.

Today, Phin is thriving as a high school student with an environmentally-inspired courseload, including Recreational Leadership where he's sharing his passion for nature with the next generation. After graduation, Phin wants to become a carpenter—using reclaimed wood and sustainable practices to help make the construction industry more eco-friendly!

Sunita joined Earth Rangers in 2014, at 8 years old. A decade later, she has joined the ER Teens program, and continues to take action for the environment. Sunita produced and screened her documentary, *Green Horizons*, at the Empowering Youth for Environmental Action event. She also raised nearly \$300 for river otters through a Take a Stand for Wildlife fundraiser.

"Participating in the ER Teens program has allowed me to see myself as a leader. I've been able to bring my ideas to life on a scale I never thought possible while deepening my commitment to conservation and the environment."

Sunita's and Phin's journeys are just two examples of what it means to be an Earth Ranger. It's more than just a membership card—it's a mindset that kids carry with them their whole lives. Over the years, Earth Rangers across the country have taken real action to make their homes, schools, and communities more sustainable, inspiring others along the way and proving that young people can lead the way to a better future.

2015
The School Assembly makes its inaugural visits to Yukon and the Northwest Territories, filled with exciting content about the wildlife of Canada's North.

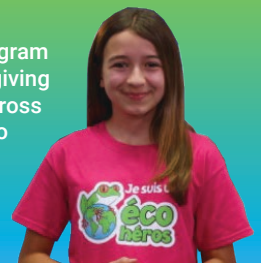

Celebrity Lorelei Bachman releases *Margo Madagascar and Cosmo the Ring-Tailed Lemur: An Earth Ranger Story*—a children's book about wildlife conservation.

We partner with Ontario's Ministry of Natural Resources to fight the spread of white-nose syndrome in bats.

2016
Our Membership program launches in French, giving Francophone kids across Canada the chance to become Éco Héros!

NEW MISSIONS

FUTURE FARMER

This new Mission introduces kids to regenerative agriculture in an easy, accessible way, with fun activities and helpful tips for growing an eco-friendly home garden. With composting how-to's, at-home soil tests, companion planting guides and more, Earth Rangers like Elodie planted and nurtured regenerative gardens in their own backyards.

"Doing home gardening can help the environment!" - Earth Ranger Elodie

I CAN FIX IT!

Can you fix it? Earth Rangers members certainly can! To bring the concept of circular economy to life, we provided kids with easy, step-by-step guides to repairing their favourite toys, books, and clothes. Each simple fix keeps a beloved item out of landfill and counters the effects of overconsumption!

"You shouldn't throw things away when they break." - Earth Ranger Enzo

PROJECT 2050

BIG SPLASH

Earth Rangers members logged an astonishing **250,000 habits** in our quest to conserve water! From dew collecting to staggering showers, our members not only worked together to develop more sustainable habits—they supported our partnership with Water Rangers to provide water quality testing kits to Les Scientifines and the Métis Nation of Ontario Water Monitoring Program, who are teaching young people how to keep our waterways clean and healthy for everyone!

MYTH-BUSTER

The latest Project 2050 Challenge debunked climate change myths like "wishcycling" (the notion that everything with a recycling symbol can be recycled), and helped kids develop the critical thinking skills to identify and respond to greenwashing.

2016

We deliver the School Assembly in Nunavut, making this the first year we visited all 13 Canadian provinces and territories.

Earth Rangers members raise a record **\$665,311** to protect wolverines, peregrine falcons, little brown bats, and cold-water coral in Canada.

2017

We partner with NCC to help preserve a 15,000-year-old peat bog, protecting critical habitat for the endangered Jefferson salamander.

2018

Earth Rangers Clubs program launches.

EDUCATOR RESOURCES

We've deepened our support for educators with more tools, resources, and hands-on learning opportunities designed to inspire young conservationists.

HOMEROOM

Homeroom is our go-to space for teachers looking to bring conservation education to life in the classroom. From hands-on activities to a monthly newsletter, we support the incredible educators across the country in nurturing the next generation of changemakers.

In 2024 we rolled out 10 brand-new classroom activities! Students organized clean-ups,

practiced mindfulness in schoolyards and parks, and learned to express gratitude for nature through the lens of Haudenosaunee traditions.

EARTH RANGERS CLUBS

In 2024 we welcomed 301 new eco-clubs under the Earth Rangers Clubs banner, bringing student-led energy to schools across Canada and the U.S. We kicked things off with our very first Club Quest—a series of fun, waste-busting challenges that awarded each participating club with a limited-edition Fall Quest pennant to proudly display at their school!

Scarborough's Club 5 got crafty with paper plates and recycled scraps to whip up this year's Christmas decorations—then signed a pledge to reduce waste wherever they go!

Down in Nacogdoches Texas, the Girls Go Green club all signed our waste-reduction pledge and completed the quest together. Let's hear it for Hannah, Emily, Abby, Allison, Clara, Betty, Emmerie, Claire, and Ezra!

P.S. Hannah was also named Earth Ranger of the Year for her community volunteering! Check her out on the cover of Kind News.

2018

The first episodes of the Earth Rangers Podcast hit the airwaves, earning 55,000 downloads in its first year!

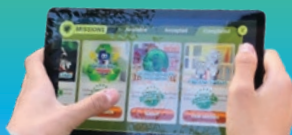

2019

We partner with the Kwikwetlem First Nation and the Watershed Watch Salmon Society to hatch and release thousands of sockeye salmon into BC's Coquitlam River.

2020

We launch the Earth Rangers App, a fun and immersive digital experience where members take eco-action, earn rewards and explore ecosystems!

We introduce Wildlife Adoptions, allowing families to symbolically adopt an animal to support conservation.

During COVID-19 school closures, we continue delivery of our assembly virtually to keep kids engaged in environmental education.

FROM ECO-ANXIETY TO ECO-ACTION

"Is the planet going to be okay?"

"Why isn't anyone fixing this?"

"What's going to happen to the animals?"

Kids today are more tuned in than ever—and they're asking big, important questions about the future. But for many educators, knowing how to respond can be tough. How do you ease a student's worry without brushing aside their very real concerns?

That's exactly why we created **From Eco-Anxiety to Eco-Action: Strategies to Support Students**—a professional development course to help educators guide young people through climate concerns and toward meaningful action.

In 2024, we delivered four sessions of the course, along with a series of seminars and presentations that gave teachers the tools—and the confidence—to **turn eco-anxiety into empowerment.**

"This course opened the door for me to understand student anxieties related to rapidly changing environmental conditions."

Janit, Park Planning
Sustainability
in Virginia

"This course allowed me to gauge my own level of anxiety, normalize it and then move onto action. It's important to do the same with the children I work with. I feel inspired and excited to continue my own work with this new knowledge and resources."

Lu, Environmental Community
Group Chair in Ontario

"This course provides tangible, real-world studies and examples are given to help busy teachers get started in building their own plans on how to implement various Eco-Action projects with their own students."

Amanda, Teacher from
New Brunswick

NATURE EDUCATION COLLECTIVE

Earth Rangers is proud to be a founding member of the Nature Education Collective—a coalition of five leading organizations working to make nature and environment an integral part of student education nationwide. Together, the Coalition has rolled out a strategy that will:

1. Engage students directly with hands-on, nature-based programming
2. Equip teachers through targeted professional development workshops and ready-to-use resources
3. Engage school and district leaders to consider the value of nature learning in achieving broader educational outcomes

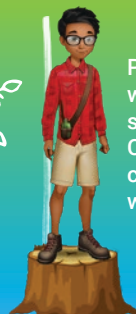

FOUNDING PARTNERS

2021

We make history! With help from a special group of members, we break the Guinness World Records title for the longest chain of paper snowflakes ever made—403.6m!

Project 2050 launches in partnership with EcoSchools Canada and supported by Environment and Climate Change Canada—featuring community challenges that teach kids teamwork while tackling climate change.

Our members support Wildlife Conservation Society Canada's work with the Yukon Government and the First Nation of Na-Cho Nyäk Dun to reduce the impact of new roads on wildlife.

2022

We partner with the International Conservation Fund of Canada to support global conservation efforts, starting with the Red Panda Network in Nepal.

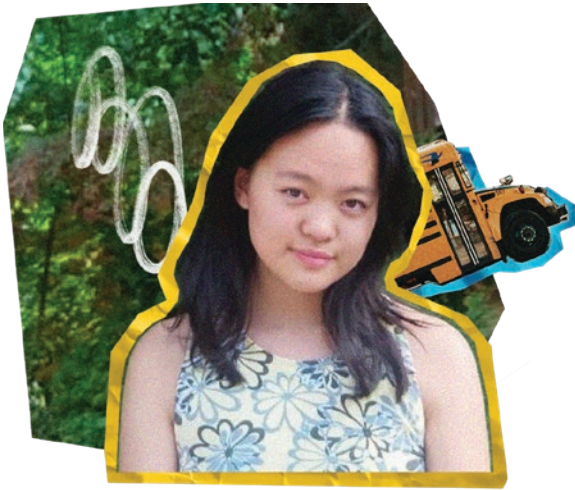

ER TEENS

ER Teens empowers youth aged 13-18 to design and lead their own eco-action projects—all over Canada!

Participants choose from ready-made projects or craft their own initiatives with mentorship from Earth Rangers. Along the way they build valuable skills, earn volunteer hours, and connect with like-minded teens.

AUDREY

Audrey worked with a community organization to share concerns about diesel school buses at a meeting with local and federal representatives – and was the youngest person to ever present with them!

“Joining ER Teens helped me rediscover my passion. It made me realize that making a big impact isn’t out of reach.”

Selena advocated for electric school buses in her neighbourhood, spreading the word through presentations, community outreach, and distributing more than 200 brochures.

“This experience was life-changing... I learned about patience, determination, collaboration, communication, and perseverance.”

KAITLYN

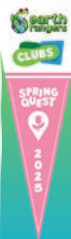

Kaitlyn tackled emissions from online shopping by creating an interactive guide to local businesses—complete with exclusive discount codes to encourage her community to shop close to home.

“My project showed me that with the right dedication and time, it’s possible to make a difference.”

2022

We add Creative Corner to the app, offering weekly animal-themed crafts, recipes, puzzles, and outdoor activities for our members.

Homeroom goes live, with monthly newsletters and a growing library of classroom-ready resources and activities for educators.

We deliver the first session of the *From Eco-Anxiety to Eco-Action* micro-credential course.

2023

Earth Rangers USA is launched, with members signing up from all 50 states.

ER Teens launches; our first program designed specifically for high school students (including many proud Earth Rangers alumni)!

PODCAST

From deep-sea adventures to rainforest mysteries, the Earth Rangers Podcast takes kids on a wild ride through the natural world—no passport required!

Hosted by the always-curious Earth Ranger Emma, each episode is packed with fascinating facts, unforgettable animal encounters, and laugh-out-loud moments that make learning about the planet fun and exciting. With millions of downloads and a growing global audience, it's become a go-to listen for young nature lovers everywhere.

In 2024 alone, the Earth Rangers Podcast was **downloaded 1.25 million times!** Throughout the year, listeners journeyed across continents and through time itself in two new action-packed seasons:

SEASON 7: MYSTERIES OF THE ANIMAL KINGDOM

Why can't penguins fly? Do any mammals lay eggs? And seriously—how do whales sleep without drowning?

In Season 7, Emma ventures from the Australian outback to the deepest oceans, in search of answers to some of the most perplexing mysteries in the animal kingdom.

SEASON 8: EARTH INVESTIGATORS

What happens when a rival podcaster starts spreading misinformation about mythical creatures? Emma puts on her detective hat.

From Scotland's Loch Ness to the Himalayan home of the Yeti, Emma separates fact from fiction, uncovering the real animals and rich cultural histories behind the world's most legendary cryptids. It's folklore meets fieldwork in the most adventurous season yet!

2024

We deliver our first assemblies in Michigan and Wisconsin.

The Nature Education Collective is formed to scale nature-based learning across Canada.

The **next 20 years** start now—and we can't wait to see what they'll bring . . .

Behind every Mission completed, every animal protected, and every student inspired, there's a dedicated community of supporters making it all possible.

From long-standing corporate partners and philanthropic foundations to individual donors and all levels of government, our supporters play a vital role in empowering the next generation of environmental leaders. Many have stood behind Earth Rangers for over a decade, helping us to grow from a community-based school program into a national force for environmental education and action.

Earth Rangers Headquarters is located on the Traditional Lands of many nations, including the Anishinaabek and Haudenosaunee, and is today the territory of the Mississaugas of the Credit. The thriving ecosystems that surround us have been shaped by thousands of years of knowledge, respect, and stewardship by its original Indigenous caretakers, and we are grateful to work here each day.

Earth Rangers is on a journey to better understand the history of the Indigenous Lands and our place on it—and help kids to do the same.
