

For the Birds Mission

Build a Homemade Bird Feeder

Did you know that birds turn food into energy at a faster rate than most other animals? In other words, they get hungry more often and need a constant supply of food.

Unfortunately, there are times when some birds can't get enough to eat. During harsh winters, wet or cool springs and stormy summers, a little extra food goes a long way.

**That's why for this mission,
we want you to help feed the birds!**

For this mission you must:

- Build a bird feeder
- Watch for birds and record the birds you see on your 'For the Birds' Tracking Sheet
- Test your bird knowledge by completing the quiz
- Go to EarthRangers.com/missions, and report your findings
- Receive your 'For the Birds' Mission badge by completing all of the above
